Joana Trots

Frontend Developer & Web Designer

👋 Hi! I'm an ambitious frontend developer with a good sense of beauty and willingness to work with the latest technologies. I'd like to create stunning websites with a clean code. Currently learning React and UX/UI. And always ready for challenges 💪

Experience

Junior Frontend Developer

Digital Marketing Agency "DIGITALIZM", *Minsk, Belarus — (Sep 2020 - Sep 2022)*

- Initially focused on front-end, built and maintained websites using HTML/CSS, Haml, Less, Scss/Sass, Javascript, jQuery, React, Node.js (npm, yarn).
- Worked with other developers (using GitLab), as well as graphic and UX/UI designers (using Figma), to implement the design and improve the appearance of a websites.
- Assumed responsibility for following all SEO guidelines and website validity.
- Fixed minor bugs. Reviewed and validated the development of new features to ensure the design and underlying logic remained consistent.
- Created websites with various CMS (Sitecore, Wordpress, Bitrix) and website builders (Adobe Experience Manager, Tilda, Robobill).
- Created and configured emails using MailChimp and Stripo.
- Took active part in regular meetings such as Retrospectives, One-on-ones, Team-buildings, Brainstorming and Problem-solving meetings, mostly using Google Meet and Miro boards.
- Communicated with PM's and other teams through the task management tools like Targetprocess and Trello, Notion and Slack.
- Examples of the websites I've worked on: Mastercard, Digitalizm, Robobill, Lockstream, Sanofi, Komfort-vnutri.ru.

Web Specialist

Belarusian Universal Commodity Exchange, *Minsk, Belarus — (Aug 2019 - Aug 2020)*

- Worked as a website administrator and webmaster (CMS Bitrix).
- Developed new pages for an existing website.
- Created print design with Adobe Photoshop and Illustrator.
- Provided technical support for employees of other departments.

Web Designer

Main information-analytical center of the Ministry of Education of the Republic of Belarus, *Minsk, Belarus — (Jul 2018 - Aug 2019)*

- Worked in a team as a Frontend developer (Html, Css, Javascript, jQuery, Bootstrap, Ajax) and Web Designer (UI/UX using Figma and Photoshop).

- Designed and developed a website for International technical exhibition 2018, created the design of all printed materials for this event (from flags to badges).

- Participated in the development of websites for the Ministry of Education of the Republic of Belarus (edu.gov.by, minzdrav.gov.by, giac.by, airo.unibel.by).

Skills

Technologies

HTML, CSS, SCSS/SASS - I enjoy the "slicing" process using Flex-box and Grid Layouts, animations, BEM methodology, responsive design (media queries) and different frameworks, e.g. Bootstrap. I also pay attention to validity, semantics, cross-browser compatibility and accessibility.

Javascript, jQuery - mainly working with the DOM, I create various scripts for web pages such as sliders, mobile navigation, pop-ups, galleries, animations, form validation, small games and other things.

React - I'm currently studying this technology. I already know about its philosophy, how to build Single Page Application and some hooks, next I'm going to learn about Testing Library & Jest, and Redux.

GIT - I use GitHub to keep track of the history of my projects. I also used GitLab working in a developers team.

Tools

Coding: Visual Studio Code, Sublime, Sourcetree

Design: Figma, Photoshop, Illustrator, InDesign, Miro, MidJourney

SEO (basics for developers): Google Analytics, Yandex.Metrica

Content management: Adobe Experience Manager, Tilda, CMS Wordpress, Bitrix, Sitecore

Time/Task Management: Jira, Targetprocess, Notion, Slack, Harvest

Additionally

SQL, PHP basics, writing test documentation (checklists, test cases, bug reports)

Languages

Belarusian, Russian 🇧🇾 🇷🇺

Native speaker

English 🇺🇸

Intermediate

Education

Bachelor's Degree in Web Programming and Web Design

Belarusian State University

2014 - 2018
